

International Day of People with Disabilities 2020

NOT ALL DISABILITIES ARE VISIBLE

15% of the world's population

is living with a disability

this is more than **1 BILLION** people

450

million

people live with mental or neurological conditions

2/3

of these individuals will not seek professional help

in part due to stigma, discrimination, & neglect

Data from WHO (World Health Organization)

Some disabilities may not be immediately apparent, including:

- Mental illnesses
- Chronic pain & fatigue
- Sight & hearing impairments
- Diabetes
- Brain injuries
- Neurological disorders
- Learning differences
- Cognitive dysfunctions

EVERY YEAR

69 million

individuals are estimated to sustain Traumatic Brain injuries

1/160 children

are identified as on the autism spectrum

#NotAllDisabilitiesAreVisible #NothingAboutUsWithoutUs

"A reminder of the importance of removing barriers for all people living with disabilities, both visible & invisible."
